

Snakes and Ladders

You know the rules - ladders help you get to the top, snakes make you slide away. If 100 is the best and 1 is the worst what are the ladders, experiences and ideas, which move towards best practice/experience and what are the snakes, experiences, which slide towards poor practice/experience?

Children/young people can also be asked to think about personal experiences and place them where they think they fit between worst at number 1 and best at number 100.

Highland Children's Forum and Highland Youth Voice used this method to create a big snakes and ladders banner with the ideas young people had about what helped or hindered participation. Young people's experiences were written over the board, placed from worst to best practice.
